- **Manufactured to current Australian Standard AS/NZS 4859.1:2002. Lic No. 818. Energymasta**

ENERGYMASTA cellulose insulation is manufactured in accordance with current Australian Standard AS/NZS 4859.1:2002 under the stringent control of the Australian Standard Quality Assurance and Certification Department. It has also been accredited by the Building Control Accreditation Authority - Department of Planning and Housing.

ENERGYMASTA cellulose insulation is manufactured from the highest quality recycled newsprint and is permanently treated with Borax and Boric Acid fire retardants. There are no known health risks associated with its intended use. Our product is of the highest quality material available and to this end, our company offers a Lifetime Guarantee. It is not to be misinterpreted with other inferior products on the market that contain chemicals such as Aluminium Sulphate, Ammonium Sulphate and Ammonium Nitrate which have proven in time to cause damage to health and property.
